

A new version of the Permanent Survey Mark Plan (Form 6) has been approved, under Section 65 of the *Survey and Mapping Infrastructure Act 2003*.

The new form has some minor layout and content changes to both front and rear of the form.

A specification Completion of Permanent Survey Mark Plans has been developed to help in the completion of the form. The specification explains the requirement for each item on the form.

The new version of the form and specification are to be used when preparing a Permanent Survey Mark Plan for lodgement with the department.

The form commenced operation from 31 January 2012. While the department will continue to accept Version 3 until 30 April 2012, surveyors are requested to commence using the new Version 4 as soon as practicable.

The new version of the form and specification can be found on the department's survey standards web page at www.derm.qld.gov.au/property/surveying/technical_standards.html.
