

Drilling, completion, and abandonment of water-related bores

This context diagram shows your reporting and notification obligations for drilling, completion, and abandonment of water-related bores.

Note:

- You must notify us before you start drilling a water-related bore (e.g. water observation or supply bore), and when you complete drilling.
- You must also notify us and provide a report if you decommission or abandon the bore.
- If you are operating on an ATP or a PL administered under the *Petroleum Act 1923*, drilling of a water-related bore requires approval under Section 86 of that Act.

Legend

	Process start
