EDME Calibrations 2019

19 September 2019  
Issue 35

## **EDME Calibrations 2019**

[Surveying Alert 34](#) advised that the biennial recertification of all Qld EDME baselines would take place between late July and early September 2019. The process has now been completed, and new certificates have been published on the DNRME website [www.business.qld.gov.au/industries/building-property-development/titles-property-surveying/surveying/calibration-equipment](http://www.business.qld.gov.au/industries/building-property-development/titles-property-surveying/surveying/calibration-equipment).

Please be aware that the web page for the Gold Coast baseline is yet to be updated to indicate that the range now consists of pillars 2-8. However, the Regulation 13 certificate is correctly issued on pillars 2-8.

A map locating each baseline is available on each baseline's web page.
